Repeatability:	Not Repeatable

Student Learning Outcomes

- Explain advanced accounting terminology, concepts, principles, and frameworks.
- Perform related calculations and demonstrate the ability to use methods and /or procedures to solve advanced accounting problems.

Description

Presents financial accounting theories and practices related to business combinations and consolidated financial reporting. This includes the development of complex business structures and forms of business combinations; consolidated financial reporting for intercorporate acquisitions and operations; and the accounting for transactions of affiliated companies. Also includes accounting and reporting issues in the multinational business environment. Accounting theory and practice related to the formation, operation, and liquidation of partnerships is covered.

Course Objectives

The student will be able to:

- Define, describe, and compare forms of business combinations
 - Define, compare, and differentiate forms of accounting for business combinations
 - Describe, distinguish, and assess methods of accounting for investments in common stock, including the cost and equity methods
 - Recognize and evaluate the advantages and limitations of consolidated financial statements
 - Examine and compare traditional concepts of corporate control with changing definitions of the financial reporting entity
 - Define and examine the consolidation process
 - Intercorporate stockholdings
 - Intercompany receivables and payables
 - Intercompany sales
 - Minority interest
 - Proprietary theory, parent company theory, and entity theory
 - Definition of consolidated net income and consolidated retained earnings
- Prepare elimination entries, consolidation worksheets, and financial statements at the point of acquisition of a corporate subsidiary
 - Prepare elimination entries, consolidation worksheets, and financial statements for ongoing operations of affiliated companies
 - Analyze, calculate, and assess the impact of the transfer of noncurrent assets between affiliated parties
 - Define, examine, and evaluate multinational accounting issues, including foreign currency transactions and the management of international currency risks
 - Identify, examine, and assess the impact of multinational operations on financial reporting, including issues of the translation of foreign entity statements
 - Define, describe, and compare accounting methods for partnership formation, operation, and liquidation

Lab Content

Not applicable.

Special Facilities and/or Equipment

When taught via Foothill Global Access, on-going access to computer with email software and hardware; email address.

Method(s) of Evaluation

Methods of Evaluation may include but are not limited to the following:

Midterm exam
 Final exam
 Quizzes
 Projects
 Computerized assignments
 Research activities (online and traditional)
 Presentations
 Writing assignments
 Student participation
 Group work

Method(s) of Instruction

Methods of Instruction may include but are not limited to the following:

Lecture
 Discussion
 Cooperative learning exercises
 Self-paced
 Electronic discussions/chat
 Independent study

Representative Text(s) and Other Materials

Hoyle, Joe Ben, Thomas Schäfer, and Timothy S. Douplik. *Advanced Accounting*. 2020.

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments
