- A student will be able to describe the steps for pressure-testing a plumbing system.

Description

This course provides students with a working knowledge of service and repair work. Students will learn basic identification and troubleshooting skills needed to complete repairs in a safe and timely manner.

Course Objectives

The student will be able to:

1. Troubleshoot defective plumbing system
2. Identify proper tools needed to complete repair
3. Safely complete system repair
4. Communicate clearly with customer the extent of repairs needed
5. Complete work order paperwork legibly and correctly

Course Content

1. Plumbing service and repair tools
 - a. Hand tools
 - b. Fixture tools
 - c. Power tools
 - d. Snakes and drain cleaners
 - e. Miscellaneous
2. Safety
 - a. Material safety sheets
 - b. Job area
 - c. Fire
 - d. Confined space entry
 - e. Trenching and shoring

3. Drain waste and vent
 - a. Drain cleaning
 - b. Video inspection
 - c. Pipe repair
 - d. Water jetting
 - e. Sewage ejector repair and maintenance
4. Water distribution
 - a. Systems
 - b. Supply piping
 - c. Pipe repair
 - d. Flow detection
 - e. Cross contamination
5. Gas systems
 - a. Piping
 - b. Regulator repair
 - c. Gas service valves
 - d. Flame control
 - e. Combustion
6. Plumbing fixtures
 - a. Commercial fixtures
 - b. Residential fixtures
 - c. Bathtubs and showers
 - d. Drinking fountains/water coolers
7. Appliances
 - a. Disposers
 - b. Dishwashers
 - c. Water softeners/filters
 - d. Reverse osmosis
8. Water heaters
 - a. Electric/gas fired
 - b. Hot water supply
 - c. Tankless
 - d. Combination
 - e. Accessories
 - f. Troubleshooting
 - g. Code requirements
9. Boilers and hydronic systems
 - a. Operation
 - b. Hot water boilers
 - c. Terminal devices
 - d. Radiant and convection heating
 - e. Controls
 - f. Troubleshooting

Lab Content

1. Students will work individually and in teams to troubleshoot faulty plumbing systems.
2. Site safety check to identify any hazards.
3. Rebuild and/or repair faulty systems.

Special Facilities and/or Equipment

1. Classroom facilities with AV capabilities
2. Plumbing lab with tools and training equipment

3. Personal protective equipment

Method(s) of Evaluation

Methods of Evaluation may include but are not limited to the following:

Written exams
Hands-on demonstration
Classroom discussion
Group exercise

Method(s) of Instruction

Methods of Instruction may include but are not limited to the following:

Discussion
Demonstration
Hands-on learning

Representative Text(s) and Other Materials

United Association. Plumbing Service, Maintenance, and Repair. 2017.

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments

1. Reading
 - a. Material safety sheets
 - b. Equipment specification sheets
 - c. Manufacturers recommendations/repair manuals
 - d. Textbook
 - e. Internet resources
2. Written
 - a. Textbook worksheets
 - b. Written analysis of defective system
 - c. Daily report forms
 - d. Material order forms

Discipline(s)

Plumbing
