Student Learning Outcomes

- A successful student will be able to use proficient drawing skills in representational chiaroscuro and line drawing exercises.
- A successful student will be able to understand and use appropriate drawing terminology in class discussions, critiques, assessments and reflections.

Description

In this beginning-level drawing course, students will analyze form and incorporate value, the concepts of light and shadow patterns, perspective, proportion, and composition in the practice of drawing. In-depth theory and practice of charcoal drawing. Great works of historical drawings will be studied in relation to value, line, form, space, and composition.

Course Objectives

The student will be able to:

a. Recognize and describe works of drawings which distinguish different types of lines
b. Analyze how artists use light and shadow to create depth of space by examining great works of drawing throughout history, including the progression of form and space
c. Examine the development of linear perspective through the study of historical and contemporary important works of drawing
d. Identify the various uses of texture and explain how texture is related to the overall meaning and purpose of the drawing
e. Compare great works in terms of composition and how the composition contributes to our perception and meaning of the drawing
f. Examine use of the content and context in great works of drawing in written format
g. Describe the use of drawing media throughout history, including how the use of different media results in establishing the overall expressive and conceptual meaning of the work
h. Evaluate and critique class drawing perceptual projects using relevant terminology in oral or written formats
i. Examine and describe contemporary developments, trends, materials, and approaches in drawing
j. Measure and draw proportions from observation
