Student Learning Outcomes

- Gain analytical skills to evaluate business opportunities and decisions for capital investments with various financial metrics.
- Develop analytical skills to evaluate financial statements using a variety of analytical tools.
- Analyze investment vehicles to value securities (bonds, stocks and other assets).

Description

This course provides an introduction to the fundamentals of financial analysis and applications to business challenges in valuation, risk analysis, corporate investment decisions, and basic security analysis and investment management. The four major sections of the course are: (A) an introduction to the financial system, financial statement analysis; (B) interest rates and valuing cash flows: time value of money; interest rates; valuation of stocks, bonds; (C) valuation of the firm: investment decision rules, fundamentals of capital budgeting, stock valuation (NPV); and (D) introduction to risk and return: risk and return; systemic risk; portfolio theory, CAPM, WACC.

Course Objectives

The student will be able to:

- Evaluate financial statements to improve business decision-making.
- Explain the time value of money for business choices.
- Determine securities valuations for various investment vehicles.
- Describe capital expenditures choices with standard financial techniques (net present value, etc.).
- Define selected terms: risk, return, systemic risk, cost of capital, portfolio theory and diversification, Capital Asset Pricing Model (CAPM), Weighted Average Cost of Capital (WACC).
- Apply learning to real projects, cash studies and start-up valuations for VC pitches.
