

D H 320B: CLINICAL DENTAL HYGIENE II

Foothill College Course Outline of Record

Heading	Value
Effective Term:	Fall 2024
Units:	6
Hours:	1 lecture, 16 laboratory per week (204 total per quarter) This is a clinical laboratory course.
Advisory:	Not open to students with credit in D H 62B.
Degree & Credit Status:	Degree-Applicable Credit Course
Foothill GE:	Non-GE
Transferable:	CSU
Grade Type:	Letter Grade Only
Repeatability:	Not Repeatable

Student Learning Outcomes

- The student will evaluate assessment findings and prepare a patient competency project, including the clinical dental hygiene treatment and scientific evidence-based research on the geriatric with a score of at least 80% on the grading rubric.
- The student will apply the principles of dental hygiene instrumentation and complete a clinical mock board examination with a score of at least 75%.

Description

This course is a continuation of dental hygiene clinic practice, with an emphasis on assessments, planning, and implementation of comprehensive dental hygiene care for diverse patient populations including those with special needs. Students apply knowledge, critical thinking, and clinical skills acquired in previously completed dental hygiene theory and clinical courses. Progress of development in clinical performance will be evaluated with each successive academic period. Intended for students in the Dental Hygiene Baccalaureate Degree Program; enrollment is limited to students accepted in the program.

Course Objectives

The student will be able to:

- Collect and analyze dental hygiene assessment data on diverse patient populations in the clinical setting.
- Develop patient-centered dental hygiene treatment plans that ensure patients' individual needs are understood and respected.
- Implement compassionate, evidence-based dental hygiene care for diverse patient populations in the clinical setting.
- Evaluate dental hygiene treatment outcomes for patients in the clinical setting and make appropriate recommendations for continuing care.
- Develop patient-centered oral health education plans based on assessment data and patient values.
- Demonstrate infection control and hazardous waste management practices that are in compliance with the Minimum Standards and OSHA regulations.

- Apply the legal and ethical principles of dental hygiene practice to the delivery of patient care in the clinical setting.
- Apply constructive feedback to develop self-assessment skills that lead to clinical competency.

Course Content

- Dental hygiene assessment data (Lec and Lab)
 - Assessment data
 - Relevant medical and dental information
 - Extraoral and intraoral examination findings
 - Periodontal examination
 - Caries examination and dental charting
 - Risk assessments
 - Periodontal risk using evidence-based applications, radiographs, periodontal examination, bacterial testing, and patient interview
 - Caries risk using evidence-based applications, radiographs, caries examination findings, patient interview, and saliva testing
 - Oral cancer risk using evidence-based applications, extra/intraoral examination findings, and patient interview
 - Dietary information
 - Current oral hygiene habits
 - Consultation with medical/dental professionals
- Dental hygiene treatment planning (Lec and Lab)
 - Treatment recommendations based on the patient's individual needs
 - Comprehensive dental hygiene treatment plans
 - Individualized goals and treatment outcomes
 - Oral hygiene instructions
 - Dental hygiene care by appointment
 - Faculty consultation
 - Appropriate medical/dental referrals
 - Development of professional communication skills
- Dental hygiene treatment procedures (Lec and Lab)
 - Preventive and therapeutic dental hygiene procedures
 - Complete removal of calculus, soft deposits, plaque biofilm, stains, and the smoothing of unattached surfaces
 - Non-surgical periodontal therapy
 - Gingival scaling
 - Periodontal maintenance
 - Prophylaxis
 - Pain control procedures
 - Topical anesthesia and non-injectable anesthetics
 - Local anesthesia
 - Adjunctive dental hygiene procedures
 - Selective coronal polishing
 - Dentinal desensitization treatments
 - Pit and fissure sealants
 - Topical fluoride treatments
 - Locally delivered antimicrobials
 - Post-operative instructions
 - Instrument care and maintenance
 - Sharpening techniques
 - Emergency management

- f. Rotation duties
 - i. Screener
 - ii. Radiology lab
- g. Time management strategies
- 4. Evaluation of dental hygiene treatment (Lec and Lab)
 - a. Evaluation of healing following treatment
 - i. Identification of clinical parameters to assess healing
 - b. Re-evaluation appointments
 - c. Recare intervals
 - d. Dental referrals
- 5. Oral health education strategies (Lec and Lab)
 - a. Oral hygiene education
 - i. Patient-centered strategies
 - ii. Patient values
 - iii. Patient motivation
 - iv. Manual dexterity
 - b. Nutritional counseling including dietary analysis
 - c. Educational techniques/methodologies, and learning styles/preferences appropriate throughout the lifespan
- 6. Infection and hazard control protocols (Lec and Lab)
 - a. Infection control procedure for disinfection of the dental operatory and sterilization of instruments
 - b. Prevention of cross contamination
 - c. Duties of sterilizer
 - d. Equipment maintenance, spore testing, and quality control records
- 7. Law, ethics, and professionalism (Lec and Lab)
 - a. Accurate and detailed patient records
 - b. Patient confidentiality and HIPAA regulations
 - c. Delivery of respectful and culturally competent care
 - d. Professional ethics and conduct when interacting with patients, faculty, and peers

Lab Content

1. Dental hygiene clinical practice: Students assessing, planning, implementing, and evaluating dental hygiene care on a diverse range of patients across the lifespan in a clinical setting
2. Dental hygiene students participate in the following as part of their dental hygiene experiences:
 - a. Dental unit preparation, patient chart review, and faculty huddle before clinic session begins
 - b. Post-appointment one-on-one faculty/student consultations
 - c. One-on-one student/clinic coordinator conferences for dental chart audits and review of clinic requirements
 - d. Off campus clinical rotations

Special Facilities and/or Equipment

1. Multimedia classroom and dental hygiene clinic including sterilization area and radiology lab. Dental supplies, student instrument kit, typodont, personal protective barriers, expendable supplies.
2. When taught as a hybrid course, access to computer with email software and hardware; email address.

Method(s) of Evaluation

Methods of Evaluation may include but are not limited to the following:

Examinations: students must achieve a passing grade of 75% or higher

1. Test Case Examination with moderate calculus
 2. Manikin Mock Board Examination
- Clinic competencies:
1. Periodontal probing with grade of 80% or higher
 2. Instrument sharpening competency with passing grade of 85% or higher
 3. Oral hygiene instruction competency with grade of 80% or higher
 4. Local anesthesia competencies
- Clinic requirements:
1. Complete dental hygiene care on a minimum of 12 patients
 2. Complete a patient competency project with grade of 80%

Method(s) of Instruction

Methods of Instruction may include but are not limited to the following:

Lecture
Laboratory
Clinical instruction

Chan, P., J. Leicht, and P. Staana. Foothill College Dental Hygiene Clinic Manual. 2024.

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments

1. Write a 5-7 page research/reflection report on a patient treated in the clinic for competency and complete all required assignments and paperwork for competency project.
2. Reading assignments (weekly) in the clinic manual, textbooks, evidence based scholarly research articles as a means for being prepared to deliver dental hygiene care to clinical patients.
3. Write a reflection on one DH program competency in the e-portfolio.
4. Document assessment findings, treatment plans, dental hygiene treatment entries, referrals, and in the patient electronic charts for patients seen in the clinic each week.
5. Complete a clinical case study assignment by analyzing assessment data.

Discipline(s)

Dental Technology
