#### **Student Learning Outcomes**

- Analyze shocks to the foreign exchange market using a supply and demand diagram.
- · Assess the relative merits of protectionist arguments.
- · Employ economic models to illustrate the benefits of free trade.

#### **Description**

Analysis of increasing economic integration in the post-WW II era with a focus on international trade and investment. Topics covered include the pros and cons of economic globalization, industrial policy, multinational corporations and sweat shops, exchange rate determination, capital flows, and exchange rate crises. Honors students will represent a unique country throughout the course and present on current events related to the course content throughout the term.

#### **Course Objectives**

The student will be able to:

- 1. Graphically illustrate and explain comparative advantage.
- Graphically illustrate tariffs and quotas in the supply and demand model.
- 3. Critically assess the motivations for protectionism.
- Analyze exchange rate adjustments employing the supply and demand model
- 5. Evaluate balance of payment transactions and accounting.
- 6. Examine the origins of a balance of payments crisis.
- Compare and contrast contending views on global economic relations.
