Student Learning Outcomes

- Students will be able demonstrate knowledge of the historical significance of women in sport
- Students will gain knowledge on culturally significant events and people that affected women's sports.

Description

This course provides students with a chronological history, analysis and interpretation of people, events, and issues that affect women in sport, in past and present day society. Physiological, sociological and psychological aspects of female athletes as related to sports, history, and education will be covered. Students will gain an understanding of the significant events of women in athletics from the past to the present and how their significance will determine the future of women in sports.

Course Objectives

The student will be able to:

- Develop an understanding of the history and impact of women in athletics/sports
- Demonstrate critical analysis of physiological, sociological, and psychological issues of women in sports
- Examine the unique needs of female athletes, their stamina, and physical abilities
- Assess the impact of female athletes and such obstacles as pregnancy, balancing families, and their gender identity
- Develop student responsibility
- List past and present sociological and historical issues as they relate to women athletes in sports and society
- Determine how athletics can be means to future education and career prospects through scholarships and various funding opportunities for women athletes
- Develop ideas about the possible future for women in sports as related to career opportunities
- Interpret the impact of sport participation on life after sports
