Student Learning Outcomes

- A successful student will be able to Identify and assess the challenges presented in a fitness setting.
- A successful student will be able to formulate a comprehensive exercise program for a specific disabled client

Description

Introduces fitness professionals to the information and skills necessary to work with the disabled and/or older adult client in an adaptive fitness setting. Provides history and overview of adaptive fitness. Includes overview of specific disabilities. Addresses fundamentals and benefits of adaptive fitness, basic anatomy, muscles and movement, contraindicated exercises, and assessment techniques. Will also include exercise program design.

Course Objectives

The student will be able to:

a. Discuss the history and an overview of adaptive fitness
b. Define and discuss information regarding specific disabilities
c. Summarize the fundamentals and benefits of adaptive fitness
d. Identify and understand basic surface anatomy
e. Discuss and evaluate muscles and movements while performing basic exercises
f. Identify appropriate assessment techniques
g. Distinguish contraindicated exercises
h. Design an adaptive fitness program

Course Content

a. History and overview of adaptive fitness
   i. Section 504 of the Rehabilitation Act
   ii. From adapted physical education to adaptive fitness
   iii. How improved fitness can foster improved quality of life
   iv. Changes that a disabling condition has on a individual’s life
b. Specific disabilities
   i. Metabolic conditions
      1. Diabetes
      2. Obesity
   ii. Cardiovascular and respiratory conditions
      1. Heart disease
      2. Asthma
      3. COPD
   iii. Neurological conditions
      1. Multiple sclerosis
      2. Parkinson disease
      3. Stroke
      4. Spinal cord injury
   iv. Orthopedic conditions
      1. Arthritis
      2. Joint replacements
      3. Osteoporosis
      4. Low back conditions
c. Fundamentals and benefits
   i. Improvement in movement and mobility
   ii. Reduced risk factors for chronic conditions
   iii. Lessened symptoms related to mental health issues
   iv. Enhanced self efficacy
   v. More productive member of society
d. Basic surface anatomy
   i. Upper extremity
   ii. Torso/back
   iii. Hip/pelvic
   iv. Lower extremity
e. Muscle and joint movement
   i. General anatomical movements, joint stability
   ii. Location of major surface anatomy
   iii. Interaction of muscles in movement
   iv. Muscles and movements when performing exercises
f. Assessment techniques
   i. Flexibility
   ii. Cardiovascular endurance
   iii. Muscle strength
   iv. Muscle endurance
   v. Balance
   vi. Coordination
   vii. Posture
g. Contraindicated exercises
   i. Dos and don'ts
   ii. Exercise rationale
   iii. Safety considerations
h. Design an adaptive program
   i. Flexibility
   ii. Cardiovascular endurance
   iii. Muscle strength
   iv. Muscle endurance
   v. Balance
   vi. Coordination
   vii. Posture
Lab Content
Not applicable.

Special Facilities and/or Equipment
1. Multimedia classroom.
2. Classroom accessible to the disabled.
3. When taught via Foothill Global Access, on-going access to computer with email software and hardware; email address.

Method(s) of Evaluation
Methods of Evaluation may include but are not limited to the following:

Class participation
Oral presentation of case study
Oral and written quizzes, midterm exam
Written case study

Method(s) of Instruction
Methods of Instruction may include but are not limited to the following:

Lecture
Discussion
Cooperative learning exercises
Field work
Oral presentations
Demonstrations

Representative Text(s) and Other Materials

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments
a. The student will complete a comprehensive case study about a client, discussing all aspects of the client. The case study will be an overview of a client that the student worked with, from the physiology and dysfunction of the condition to the psycho/social aspects of the client. Confidentiality will be respected regarding the client in the case study.

Discipline(s)
Physical Education (Adapted): Disabled Student Programs and Services
