Degree & Credit Status: Non-Degree-Applicable Credit Course Basic Skills

Foothill GE: Non-GE

Transferable: None

Grade Type: Letter Grade (Request for Pass/No Pass)

Repeatability: Not Repeatable

Formerly: MATH 280

Description

A just-in-time approach to the core prerequisite skills, competencies, and concepts needed in Quantitative Reasoning. Intended for students who are concurrently enrolled in MATH 40A at Foothill College. Topics include: a review of computational skills developed in beginning and intermediate algebra, including proportional reasoning, order of operations, simplifying expressions, solving equations, use of variables, creating and using graphical displays.

Course Objectives

The student will be able to:

a. Plan, implement, and assess their work cycles, at the problem, lesson, module, and course level, to develop self-efficacy through the practice of self-regulated learning.
b. Collaborate to collect, assemble, discuss, and present culturally-relevant information using team member knowledge, reading strategies, and the internet.
c. Read, comprehend, and discuss quantitative situations drawn from the fields of personal finance, health and wellness, environmental technologies, and civic engagement.
d. Demonstrate an understanding of mathematics by writing complete and correct responses to questions.
e. Use algebraic notation and symbol manipulation strategies.
f. Use dimensional analysis to solve complex problems.

course Content

a. Plan, implement, and assess work cycles, at the problem, lesson, module, and course level, to develop self-efficacy through the practice of self-regulated learning
   i. Workload analysis
      1. School/study time calculation
      2. Plotting weekly calendar
   ii. Math support resources
      1. Classmates
      2. Instructor
      3. Tutoring resources
   iii. Learning opportunities in math
      1. Productive struggle
      2. Deliberate practice
      3. Explicit connections
      4. Collaboration and teamwork
b. Collaborate to collect, assemble, discuss, and present culturally-relevant information using team member knowledge, reading strategies, and the internet
   i. Build collaboration skills
   ii. Mathematical identity development
   iii. Cultural capital recognition and development
   iv. Quantitative communication skill development
c. Read and discuss quantitative situations drawn from the fields of personal finance, health and wellness, environmental technologies, and civic engagement
   i. Reading comprehension strategies
      1. Comprehension and Synthesis Chart
      2. Qualitative information and vocabulary
      3. Quantitative information and vocabulary
      4. Plan of action
   ii. Reading apprenticeship routines, such as:
      1. "Think Aloud" or
      2. "Talk to the Text"
   iii. Discussion strategies and norms
      1. Think time before share
      2. Whip around discussion format
d. Employ strategies for writing complete and correct responses to questions
   i. Simple and complete
   ii. Specific
   iii. Stand-alone
e. Use algebraic notation and symbol manipulation strategies
   i. Variables
      1. Subscripts
   ii. Order of operations
   iii. Units and dimensional analysis
   iv. Solve equations
      1. Linear
      2. Radical
      3. Exponential
      4. Quadratic
   v. Inequalities
   vi. Evaluating formulas
f. Use dimensional analysis to solve complex problems with multiple pieces of information and steps
   i. Units
      1. Conversions
      2. Equivalencies
   ii. Application to real life problems
   iii. Equations and proportions

Lab Content
Not applicable.

Special Facilities and/or Equipment
1. Access to graphing technology, such as a graphing calculator or graphing software.
2. Access to a computer and the internet.

Method(s) of Evaluation
Methods of Evaluation may include but are not limited to the following:

Group and independent exploratory activities
Homework
Performance in MATH 40A

Method(s) of Instruction
Methods of Instruction may include but are not limited to the following:

Group work
Discussion
Mini-lectures
Instructor-guided discovery
Formative assessment

Representative Text(s) and Other Materials
No course materials.

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments
a. Problem sets
b. Exploratory activities and/or projects
c. Reading and/or writing assignments

Discipline(s)
Mathematics
