

NCAL 402I: FIGURE DRAWING II FOR OLDER ADULTS

Foothill College Course Outline of Record

Heading	Value
Effective Term:	Winter 2026
Units:	0
Hours:	3 lecture, 3 laboratory per week (72 total per quarter)
Degree & Credit Status:	Non-Degree-Applicable Non-Credit Course
Foothill GE:	Non-GE
Transferable:	None
Grade Type:	Non-Credit Course (Receives no Grade)
Repeatability:	Unlimited Repeatability

Student Learning Outcomes

- Critique intermediate figure drawings based on anatomy terminology and criteria.
- Draw the human form with attention to basic anatomical structure and proportion.

Description

This noncredit course is targeted towards older adults. Intermediate figure drawing course emphasizing the development of drawing skills in depicting the human figure. This is a practical and theoretical course that emphasizes proportion and basic human anatomy.

Course Objectives

The student will be able to:

1. Demonstrate skills in drawing the human figure from observation in a representational style.
2. Demonstrate an ability to draw interpretive expressions of the human figure.
3. Demonstrate different figure proportion systems.
4. Incorporate historical and contemporary approaches to drawing the human figure.
5. Experiment with a variety of materials to render and complement the human figure.
6. Demonstrate a basic understanding of the human skeletal and muscular system.
7. Demonstrate communication skills in a class critique.
8. Produce drawings that creatively apply subjective matter that reflects personal and culturally diverse imagery.

Course Content

1. Demonstrate skills in drawing the human figure from observation
 - a. Hand-eye coordination
 - b. Sighting and measuring observational skills
2. Demonstrate an ability to draw interpretive expressions of the human figure

- a. Gesture drawing capturing movement
 - b. Figure in action poses
 - c. Volumes of the human figure
 - d. Gesture drawing expressing human emotion
 - e. Value drawings expressing mood and value
3. Demonstrate accurate figure proportion
 - a. Ideal human proportions
 - i. Seven and a half heads high
 - ii. Eight head measurements
 - iii. 5 eye cube measurements
 - iv. Proportion subcutaneous landmarks: ASIS, great trochanter
 - b. Sighting techniques
 4. Incorporate historical and contemporary approaches to drawing the human figure
 - a. Using references in drawing the human figure
 - b. Chiaroscuro and value patterns
 - c. Study the style and use of materials of a known figurative artist
 - d. Study the great works of contemporary figure artists in relation to the human anatomy
 - e. Study the great works of figure drawings in relation to the human anatomy
 5. Drawing materials
 - a. Sanguine Conte or Pastels
 - b. Vine Charcoal
 - c. Pencil
 - d. Oil paint washes
 6. Drawing skeletal system
 - a. Skull-cranium and mandible
 - b. Shoulder girdle: clavicle and scapula
 - c. Ribcage: sternum
 - d. Spinal column: vertebrae
 - e. Upper and lower arms: humerus, ulna, radius
 - f. Carpals, metacarpals, phalanges
 - g. Pelvis
 - h. Femur, patella, tibia, fibula
 - i. Tarsals and metatarsals
 7. Drawing the muscles of the human form
 - a. Sternocleidomastoid
 - b. Trapezius
 - c. Deltoid, pectoralis major, biceps, triceps
 - d. Latissimus dorsi, External oblique
 - e. Gluteus maximus and gluteus medius
 - f. Hamstrings, gastrocnemius
 - g. Achilles tendon, peroneus longus
 8. Demonstrate communication skills in a class critique
 - a. Evaluate the strengths and areas for improvement on the works in progress
 - b. Engage in dialogue about the finished drawings in the form of group critiques both large and small

Lab Content

1. Figure drawing exercises that explore drawing the figure in short to long poses

2. Assignments and exercises related to form. Assignments may focus on constructing the figure using volumes, chiaroscuro techniques, block in methods, additive and subtractive method, and drawing planes
3. Assignments that use the application of foreshortening perspective
4. Application of basic anatomy in gesture drawing exercises and short poses
5. Exercises that use different human proportion systems. Students will measure the human form using the seven and a half heads high proportion system, the eight heads high measuring system, or the five eye cube measuring system
6. Exercises that use the application of drawing media and tools, such as traditional drawing media by various artists throughout history
7. Drawing exercises that focus on human anatomy, the skeletal systems, muscle system, and subcutaneous landmarks
8. Exercises that have students make drawing revisions or corrections
9. Critiques, self critiques, and evaluation of drawing assignments and exercises

Special Facilities and/or Equipment

1. When taught via Foothill Global Access: on-going access to computer with email software and capabilities; email address; JavaScript-enabled internet browsing software.
2. When taught in the classroom: easels, a skeleton, stools, drapes for the room, heater, a projector and screen, portable lighting equipment, and a model stand.

Method(s) of Evaluation

Methods of Evaluation may include but are not limited to the following:

Portfolio review: each drawing will be evaluated for technical ability, craftsmanship, attention to proportion, and personal creative and conceptual approaches

Quizzes based on human anatomy and figure drawing

Written or oral participation in lectures of historical and contemporary figure drawings

Drawing revisions

Method(s) of Instruction

Methods of Instruction may include but are not limited to the following:

Drawing lectures and demonstrations using human anatomy terminology

Discussion using the human anatomy and figure drawing terminology

Demonstration of a variety of proportion systems and sighting systems

Weekly in progress figure drawings projects followed by in-class discussions and evaluations

Representative Text(s) and Other Materials

Oliver, Charles. Anatomy for Artists: A Visual Guide to the Human Form. 2021.

Winslow, Valerie. Classic Human Anatomy: The Artist's Guide to Form, Function, and Movement. 2008.

Winslow, Valerie. Classic Human Anatomy in Motion: The Artist's Guide to the Dynamics of Figure Drawing. 2015.

Although some texts are older than the suggested "5 years or newer" standard, they remain seminal in this area of study.

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments

1. Make a drawing study of the skeletal systems and muscle system using accurate human proportions
2. Write a self critique discussing the outside drawing project using figure drawing and human anatomy terminology

Discipline(s)

Art
