Student Learning Outcomes

- To relate and strengthen concepts through media, topics include: Oxygen therapy and vital signs
- Support concurrent lecture and laboratory sessions through an alternative learning resource. Students will be able to explain key aspects of Pulmonary Anatomy and Physiology and Infection.

Description

First of seven courses paralleling content taught in courses in the Respiratory Therapy Program. Focus on oxygen equipment, anatomy and physiology, vital assessments and decision making. Develop and strengthen concepts taught in the concurrent lecture and laboratory sessions of the program. Intended for students in the Respiratory Therapy Program; enrollment is limited to students accepted in the program.

Course Objectives

The student will be able to:
A. Demonstrate and describe the following skills:
  1. Vital signs assessments
  2. Oxygen delivery and devices
  3. Oximetry
  4. Pre-therapy preparation
  5. Preventing tuberculosis
  6. Pulmonary anatomy and physiology
  7. Introduction to clinical decision making

Course Content

A. Vital signs courseware
  1. Breath sounds
  2. Heart rate
  3. Respiratory rate and pattern
  4. Blood pressure
  5. Body temperature
  B. Oxygen therapy
  1. Oxygen delivery and devices courseware
  2. O2 therapy, a case study
  3. CPG oxygen therapy

B. Oxygen delivery and devices courseware
  1. O2 therapy, a case study

C. Oximetry courseware
D. Pre-therapy preparation courseware
E. Preventing tuberculosis courseware
F. Pulmonary anatomy and physiology courseware
G. Introduction to clinical decision making

Lab Content

A. Vital signs assessment
B. Oxygen delivery and devices
C. Oximetry
D. Pre-therapy preparation
E. Preventing tuberculosis
F. Pulmonary anatomy and physiology
G. Introduction to clinical decision making

Special Facilities and/or Equipment

A. Mac or PC computer

Method(s) of Evaluation

Methods of Evaluation may include but are not limited to the following:
A. Computer administered and scored examinations.
B. Quizzes.

Method(s) of Instruction

Methods of Instruction may include but are not limited to the following:
A. Self-paced
B. Independent study
C. Media lab
D. Media materials will provide an alternative learning resource for non-traditional students

Representative Text(s) and Other Materials

Although this text is older than the suggested "5 years or newer" standard, it remains a seminal text in this area of study.

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments

A. Interactive computer modules.

Discipline(s)

Respiratory Technologies
