Student Learning Outcomes

- Students will identify the two main component parts or features of the sociological imagination.
- Students will demonstrate an understanding of why the sociological imagination is sociologically significant.
- Students will identify the basis of the scientific method.
- Students will identify the leading components or indicators of methodology.
- Students will identify two of the most important ideas in Sociology as a field of study.
- Student will explain how two major ideas in Sociology as a field of study help them in their everyday lives.

Description

Introduction to the field of sociology; the scientific study of human society and the contemporary world, and the interaction of individuals and groups in society. Analysis of major theories, concepts, methods, social institutions, and social processes. Development of a sociological imagination and social context analysis. Society in its social class, racial and gendered dynamics.

Course Objectives

The student will be able to:

a. Explore the relationship between social theories and the scientific study of society.
b. Relate current social issues such as war, poverty, crime, prejudice, drug addiction to theoretical models and research studies.
c. Demonstrate competency in sociological concepts, apply same in critically analyzing selected subtopics.
d. Account for differences in sociological schools and corresponding social research methods and techniques employed.
e. Recapitulate examples of social change and social processes using sociological models.
f. Relate cultural diversity issues to subtopics including prejudice and discrimination.
g. Demonstrate a global understanding of society via the study of demography and multicultural comparisons.
h. Account for social conflict and tensions through theoretical analysis of social organization, social integration and social change.
i. Demonstrate effective reading, writing, and critical thinking skills.

Course Content

a. Introduction
   i. Basic concepts and perspectives: Micro and macro study
   ii. Early European and contemporary American theories
   iii. Sociology as scientific discipline compared to other fields of scientific inquiry
b. Research methods and models
