

V T 58L: SURGICAL ASSISTING FOR THE VETERINARY NURSE

Foothill College Course Outline of Record

Heading	Value
Units:	1
Hours:	3 laboratory per week (36 total per quarter)
Prerequisite:	V T 57L.
Degree & Credit Status:	Degree-Applicable Credit Course
Foothill GE:	Non-GE
Transferable:	CSU
Grade Type:	Letter Grade Only
Repeatability:	Not Repeatable

Student Learning Outcomes

- Students will identify the parts, and explain the use of common anesthetic equipment and circuits
- Student will understand and demonstrate proper principles of aseptic technique and the universal precautions.
- Students will demonstrate proper techniques for the preparation of surgical packs, operation of an autoclave and gas sterilizer.
- Students will memorize names, identify, properly handle, and maintain common surgical instruments.
- Students will suture non-living tissues

Description

Practical application of animal care skills and principles of animal care and management. Opportunity to participate in the health care team involved in the care, management and husbandry of program livestock, companion animals and laboratory animals. Students will also be given an introduction to anesthetic equipment, principles of aseptic technique, sanitation, disinfection and sterilization, introduction to principles of surgical nursing, basic operating room skills and instrumentation. Intended for students in the Veterinary Technology Program; enrollment is limited to students accepted in the program.

Course Objectives

The student will be able to:

- demonstrate aseptic techniques and universal precautions pertaining to surgical procedures
- memorize names; identify, properly handle, and maintain common surgical instruments
- demonstrate proper techniques for the preparation of surgical packs, and operation of an autoclave and gas sterilizer
- identify the parts and explain the use of common anesthetic equipment and circuits
- suture non-living tissues
- place intravenous catheters

Course Content

- Principles of aseptic technique and the universal precautions
 - Surgical preparation of personnel

- Surgical hand scrub
 - Drying hands
 - Donning sterile gown
 - Gloving techniques
- Surgical preparation of the patient
 - Aseptic preparation of surgical sites
 - Draping techniques
 - Transport
 - Final prep in surgical suite
 - Preparation of sterile surgical packs
 - Instrument
 - Gown
 - Towel
 - Special purpose
 - Compartment in surgical suite
 - Record keeping
- Surgical instruments
 - Identification of common surgical instruments
 - Handling and use of instruments
 - Care and maintenance of instruments
 - Surgical packs
 - Selecting instruments
 - Preparing packs
 - Operation and maintenance of the autoclave
 - Principles and method of gas sterilization
 - Identify the parts, and explain the use of common anesthetic equipment and circuits
 - Gas anesthetic machine
 - Breathing circuits
 - Re-breathing
 - Non-rebreathing
 - Suturing
 - Suture patterns
 - Simple interrupted
 - Simple continuous
 - Cruciate
 - Mattress sutures
 - Ford interlocking
 - Proper tissue handling
 - Place intravenous catheters
 - Saphenous
 - Cephalic

Lab Content

- Basic principles of facilities management and maintenance care of resident animals. Responsibilities will expand to include performing diagnostic and therapeutic procedures on resident animals.
- Practical skills involving surgical assisting.

Special Facilities and/or Equipment

- Live animals of companion, large, and laboratory animal species; housing and restraint facilities.
- Laboratory equipped with examination tables and diagnostic and therapeutic equipment and supplies as needed.

Method(s) of Evaluation

Methods of Evaluation may include but are not limited to the following:

- Evidence of responsibility in carrying out supervisory duties, technical competency, accuracy and completeness of records. Evaluation will

be done by instructor observation, peer evaluation, and examination of records

B. Final practical exam

Method(s) of Instruction

Methods of Instruction may include but are not limited to the following:

A. Discussion

B. Field work

C. Demonstration

D. Skills practice

Representative Text(s) and Other Materials

Bassert, Joanna M., and Dennis M. McCurnin. Clinical Textbook For Veterinary Technicians. 9th ed. W. B. Saunders Co., 2018.

Tear, Marianne. Small Animal Surgical Nursing: Skills and Concepts. 3rd ed. Mosby, 2016.

Types and/or Examples of Required Reading, Writing, and Outside of Class Assignments

A. Reading assignments: Weekly reading assignments from text, class handouts, and outside sources.

B. Medical record keeping for program teaching animals.

C. Daily care of program animals.

D. Skills practice with instructor and classmates.

Discipline(s)

Registered Veterinary Technician
